

The screenshot displays the Node-RED web interface within a browser. The browser's address bar indicates the URL: `https://node-red-nwmrt-2022-11-04.eu-gb.mybluemix.net/red/#flow/8665e9cd8c893c6d`. The Node-RED interface shows a flow named "Flow 2". The flow starts with a "timestamp" node, which connects to a "msg.payload" node. The "msg.payload" node then branches into three parallel "function" nodes. Each "function" node is connected to a corresponding output node: "Location", "Visibility", and "Temperature". The left sidebar shows the "common" and "function" node categories. The bottom status bar displays system metrics: "1: 2.03 MB/s", "MEM: 59 %", and "CPU: 5 %".
